

Digitens[®] 485

Measurement amplifier with digital display

This convenient digital instrument is an excellent choice for every application where precise and nonetheless economical measurement equipment is needed.

The highly functional design and a host of integral functions make the **DIGITENS[®] 485** a convenient measurement tool, universal in its applications.

- Convenient one-hand operation
- Tension displayed digitally, in the proper unit of measure
- Automatic zero setting
- Maximum value display
- Memory function
- Battery charge indicator
- Averaging over 0,5 sec.
- High-contrast, easy-to-read 13 mm LCD display
- Operation independent of line power with dry cell or accumulators
- Any tension sensors in our line with a capacitive measuring cell can be attached

Technical Information	
Display	LCD, 13 mm, 3 ½ digit
Functions	Automatic zero setting Averaging display Maximum value Memory function, Battery charge indicator
Accessories	Sensor connection cable, 2 m long
Options	Accumulator version with separate charging unit - Digitens [®] 485 A Analogue output for registration purposes (10mV/digital digit)
Dimensions	170 x 68 x 45 mm (W x H x D)
Weight	approx. 0,2 kg
